

A Website Designed with You in Mind

November 7, 2014

Greetings from the TechLoss team,

I'm excited to introduce TechLoss' new website because it will make your job easier.

Knowing how busy you are as a claims professional, we designed our new site to save you time and make it easy to interact with us. For example:

1) **Submit a Loss.**

Register once on the site, and your information will automatically populate anytime you submit a loss. Then you can just log in, click on "Submit a New Loss," answer a few questions, and send the form. You'll be contacted right away by one of our engineers.

2) **Upload Documents.**

To upload photos and other project documents, simply click on the button at the bottom of the Submit a Loss form. It's easy, fast and can handle files up to 18 MB.

3) **Track Your Cases.**

To check on the status of a project, log in and click on "Manage My Cases." In your secure, private portal, you'll see all of the latest updates and associated documentation for each case.

4) **Find a Service.**

We found that many of our clients needed services they didn't know we offered - such as litigation support. The new site outlines our consulting, restoration and other services in detail.

5) Contact Us. At TechLoss, we make ourselves available anytime you need us. The new "Get Help Now" button on our home page takes you directly to our contact info, including after-hours emergency numbers.

I invite you to experience these improvements and more at www.techloss.com. And please get in touch to let me know what you think.

Thanks, as always, for your business.

Connect with TechLoss!

Once & Done

Register on the TechLoss website today and you'll never have to enter your info again!
